## 1. Feedback Received from Students

This questionnaire is designed to make a survey of the institutional feedback. The questionnaire consists of five sections comprising 31 questions. The major sections are:

1. Course Content
2. Teaching Learning Process
3. Curriculum /Syllabus / Evaluation process
4. Library/ Sports/others
5. Administration.

The activities of the institution in the above five sections are being analyzed to create a quality profile for the year in relation to institutional vision and goals. The results would enable the institution to create a quality index profile. The students are supposed to be the most important stakeholders of Higher Education systems. The interest and participation of students at all levels in both internal quality assurance and external quality assurance must play a central role. Any Higher Education Institution needs to ensure that students have a voice at various decisions making processes, formulating learning and teaching practices and those views of students are to be considered as the primary evidence on which the quality of teaching and learning is evaluated. The Student Feedback Approach is basically about institutional practices, processes and frameworks that take into account students concerns of the quality of the education they receive. In each section, the report includes findings of the top tasks which candidates feel the most and least prepared in.
